

Health Enhancement

Health, family life and sex education, including information about parts of the body, reproduction and related topics, shall be included in the instructional program as appropriate to the grade level and course of study. The instructional approach shall be developed after consultation with parents and other community representatives. Parents may ask to review the materials to be used and may request that their child be excluded from sex education class sessions without prejudice.

Chemical Dependency

In acknowledgment that chemical dependency is a treatable health problem, the District is committed to the development of a program that emphasizes prevention, intervention, aftercare support and disciplinary actions. The District will work with the community to positively address the problem, and will be responsible for the development of this program within the existing legal, financial and policy restraints.

HIV/AIDS/STDs EDUCATION

The Board believes that Human Immunodeficiency Virus HIV/AIDS and other STDs instruction is most effective when integrated into a comprehensive health education program. Instruction shall be developmentally appropriate to the grade level of the students and shall occur in a systematic manner. The Board particularly desires that students receive proper education about HIV and other STDs before they reach the age when they may adopt behaviors that put them at risk of contracting these diseases.

In order for education about HIV and other STDs to be most effective, the Board shall require that faculty members who present this instruction receive continuing in-service training which includes appropriate teaching strategies and techniques. Other staff members not involved in direct instruction but who have contact with students shall receive basic information about HIV/AIDS and instruction in the use of universal precautions when dealing with body fluids.

Safety Program

As part of the Health Enhancement Program, the school has a responsibility for supervision of students while under the custodianship of the school system. In addition, the school has the responsibility to educate students in regard to home and school safety. For specific procedures to implement a safety education program for the District see Policies #9310.
